This article has been retracted at the request of the editors, as the authors have plagiarized part of a paper that had already appeared in Z. Phys. B. 101, 161–168 (1996). One of the conditions of submission of a paper for publication is that authors declare explicitly that their work is original and has not appeared in a publication elsewhere. Re-use of any data should be appropriately cited. As such this article represents a severe abuse of the scientific publishing system. The scientific community takes a very strong view on this matter and apologies are offered to readers of the journal that this was not detected during the submission process.
