## Erratum

## Retraction notice to “Worst-case dimensioning and modeling of reliable real-time multihop wireless sensor network” [Perform. Eval. 66 (2009) 685–700]

## ARTICLE INFO

*Article history:*

Available online 19 August 2010

Kambiz Mizanian\*, Hamed Yousefi, Amir Hossein Jahangir

Department of Computer Engineering, Sharif University of Technology, Tehran, Iran

This article has been retracted at the request of the authors and/or the Editor-in-Chief.

Reason: This article has been retracted at the request of the Editor-in-Chief of the journal and of the Guest Editors, Luciano Bononi and Isabelle Guérin-Lassous, of the Special Issue on “Performance Evaluation of Wireless Ad Hoc, Sensor and Ubiquitous Networks” in which it appeared, as the authors have plagiarized part of two papers that had already appeared in the Proceedings of the International Conference on Distributed Computing in Sensor Systems (DCOSS05), Marina del Rey, June 30–July 1 2005, USA, Springer LNCS, Vol. 3560, pp. 141–154 DOI 10.1007/11502593\_13 (Title: Sensor Network Calculus – A Framework for Worst Case Analysis, Authors: Jens Schmitt and Utz Roedig) and in the Proceeding of the Infocom 2004 Conference, Hong Kong, China, March 7–11, 2004, pp. 220–231 (Title: Modeling the performance of wireless sensor networks, Authors: Carla-Fabiana Chiasserini, and Michele Garetto).

One of the conditions of submission of a paper for publication is that authors declare explicitly that their work is original and has not appeared in a publication elsewhere. Re-use of any data should be appropriately cited. As such this article represents a severe abuse of the scientific publishing system. The scientific community takes a very strong view on this matter and we apologize to readers of the journal that this was not detected during the submission process.
